

## **Our COVID-19 Safety Protocols**

What we are doing to ensure a safe environment for healing.

- Thorough screening of patients and practitioners including temperature checks.
- Thorough COVID-19 questionnaire to be filled out online by patients prior to every session and reviewed by practitioner before allowing patient to enter clinic.
- Masks are required to be worn by everyone while in the clinic.
  - If you do not have a properly fitting mask covering both your nose and mouth, we will supply one for you.
- We are limiting the number of people in the clinic at one time. This includes patients, therapists, and staff. No guests, family, or caregivers are allowed in clinic (unless medically necessary).
- When a patient arrives, they are asked to stay in their car and text their practitioner. Their practitioner will come out and get them when ready to start treatment.
- In addition to our normal cleaning schedule, we are sanitizing treatment rooms before and after each treatment and the entire clinic throughout the day using CDC approved disinfectants.
- Air purifiers with HEPA filters in every room to remove airborne particles.
- All patients will wash their hands upon entering the building and at the end of their treatment. Soap dispensers and faucets have touchless sensors.
- Hand sanitizers are available throughout the clinic.
- Patients are asked to proceed to their treatment space without touching additional surfaces and remain away from others within the clinic.
- Linens used at CRIM are from a professional healthcare laundered company via CDC and OSHA guidelines.
- Payment will be contactless.

Thank you all for your continued support and use of the services at Cancer Rehab & Integrative Medicine (CRIM). If you have any questions, please do not hesitate to contact your practitioner at CRIM!
